

ArrowLine[®]
by **EDCO**

permanent metal

enhanced roofing

From light commercial to residential applications, ArrowLine Enhanced Metal roofing is the next wave in roofing and siding.

the next wave in me

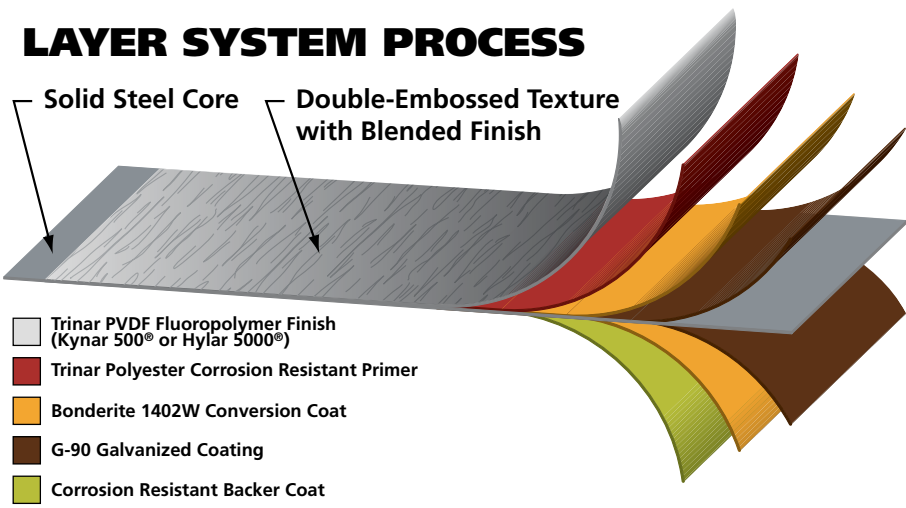

The beauty of traditional shingles — the strength and durability of steel.

ArrowLine's unique 4-way interlocking system withstands winds up to 160 mph, has the best hail rating available, and qualifies for lower insurance rates through some providers.

ArrowLine Enhanced Metal roofing is not just brute strength — Slate and Shakes are available in blended colors with trim to match for an aesthetic statement like none other.

Design and Durability

ArrowLine's Enhanced Metal Shakes™ and Metal Slate™ have a multi-tone, blended-finish design for a heightened aesthetic impact. Engineered for roofing and sidewall applications, EDCO utilizes the latest technologies to optimize the durability, ease of installation, and the 'green-ness' of your new roof.

It's more than just ordinary roofing. Unlike traditional roofing products, ArrowLine Enhanced Shakes and Slate will not warp, split, peel, or crack and defy winds in excess of 100 mph. They easily withstand frigid northern winters as well as the blistering southern sun. Dual-coated with a deluxe KYNAR 500® finish to maximize color retention, ArrowLine Enhanced Shakes and Slate are both available in 5- and 5-blended colors. All of the blended colors meet or exceed EnergyStar standards. The unique double embossing pattern adds panel strength strong enough to be walked on and can be applied over an existing roof, thereby reducing installation costs.

Excellent Performance

Arrowline has a unique 4-way locking system that allows them to be installed quickly and easily while locking out the harshest of weather conditions. Permanent and virtually maintenance-free, an ArrowLine roof will last for years to come without incurring typical upkeep expenses.

The next wave in lasting building materials makes ArrowLine the best choice for discerning owners.
